

WIND ENERGY

C A P A B I L I T I E S

September 2022

When it comes to supplying essential rental equipment, you need a company that gets the job done right.

That's the mark of Tiger.

WHO IS TIGER?

Tiger Rentals is a U.S. based rental and service company which serves the onshore and offshore oil, gas and alternative energy markets. The organization is comprised of three major companies:

- *Tiger Offshore Rentals*
- *Tiger Industrial Rentals*
- *Tiger Safety Rentals*

Our core rental assets include cargo carrying equipment, fluid tanks, pumps, power generation, temporary matting, and safety

equipment. In addition, for wind power projects, we offer shore base and safety support services during the construction, installation, and maintenance phases of operations.

Tiger operates facilities throughout the U.S. and in numerous international locations spanning the Caribbean, South America, Africa, the Mediterranean and the Middle East.

Mission

Tiger's business philosophy is to provide reliable equipment within a safe and professional culture with a "Make It Happen" attitude. Our goal at Tiger Rentals is to be #1 in our products for our geographic markets. We will accomplish this goal by providing the highest quality products in the industry, unequalled levels of service, and creative solutions for our customers' needs.

Vision

The outlook for Tiger Rentals is to flourish in future years through continuous operational improvements, relentless dedication to customer service, and sincere respect for team members.

Values

ENTREPRENEURSHIP
Every Day a Better Way"
...Taking Ownership...
Championing...Self Starting.

EXECUTION
Timely, consistent, quality task completion without undue push-back.

CUSTOMER DEDICATION
Make sure EVERY task is focused on delivering for our customers.

CANDOR
Unfiltered, timely assessment and communication which acknowledges reality.

OFFSHORE

Tiger offers purpose-built rental equipment and services for wind energy projects during the construction, installation, and maintenance phases of operation.

Our capabilities range from fully integrated managed solutions to providing specialized services tailored to specific needs.

SHORE BASE SERVICES INCLUDE:

- Confined Space Tank Cleaning
- Waste Management and Treatment
- Emergency Spill Response
- Water Treatment and Recycling
- Bulk Liquid Tank Storage
- Inspection and NDT Certification
- Supply base services and facilities support for wind energy operations

- Procurement and sub-contractor management services
- Planning and project management of logistics support services for offshore projects
- Management of goods, including inspection, preparation, and packing
- Inventory management including receiving and consolidation of goods and materials
- Local warehouse and storage services, including dangerous goods storage
- Heavy lift and over-dimension transportation

EQUIPMENT

Tiger's offshore equipment is built to the highest standards utilizing the most advanced designs and safety procedures to ensure compliance with the latest regulations. Every unit is diligently tested and maintained for superior performance. Our units are designed for offshore dynamic lifting in accordance with standards such as DNV 2.7-1, DNV 2.7-3, EN12079, API RP 2A, IMDG, ASME VIII, IM101, USCGA, ISO, UN31H2/HM-181, NORMAN 05/DPC, USDOT & UN31A.

FLUID TANKS

Tiger's tanks are designed and constructed with robust components to prevent leaks and provide reliable performance. We offer a full line of offshore tanks for fluid collection, storage, transport and disposal. Designed for acids, lubricants, aviation fuel, waste oil and waste water, tank sizes vary from 55 gallons to 21,000 gallons.

550 GALLON TOTE TANK

CARGO CARRYING UNITS

Tiger has over 75 different CCUs to choose from in a broad range of heights, widths and lengths.

Our fleet is constructed of the toughest materials and built to last. We offer ample options for specialized uses, such as additional tie downs, saddle support for containing round objects, side door access for easy loading on some DNV 2.7-1 baskets, and rubber seals on open baskets to make them fluid containment capable. Our units meet industry standards for labeling details such as load capability, and the top rails are painted safety orange for high visibility in the harsh, high-activity environments common to offshore.

INDUSTRIAL

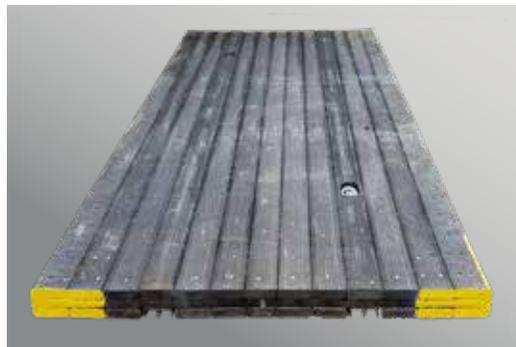

Tiger Industrial keeps a large fleet of assets prepped for immediate deployment for land based wind energy projects. Every piece of equipment we offer is put through a rigorous maintenance regimen to ensure the highest quality and performance. Our knowledgeable personnel will help you select the right equipment for the job, and we're available around the clock to offer any support you may need.

MATTING

We offer 128 sq ft of coverage with a unique 8' x 16' ECOMat® with steel runners for temporary ground protection. Our synthetic mats are proven to be safer, more durable and better for the environment compared to other brands.

- Approved for overhead lifting and meets ASME B30 lifting standards.

- Lifters are load rated to 4,000 lbs in a pair.
- Manufactured with up to 60% recycled material and designed with UV inhibitors.
- Manufactured with galvanized D-Rings to load, offload, lay, and move easily with a fork lift or lifting.
- Slip resistant pattern seared into material for improved traction.

ECOMATS®

POWER GENERATION

Tiger maintains an extensive fleet of generators and light towers for remote power generation requirements.

Generators & Light Towers

- 25 kVA - 500 kVA
- Well gas generators
- LED Light plant

GENERATORS

PUMPS & HP CLEANING

Tiger carries a variety of pumps, pressure washers and hydroblasters to meet requirements for wind farm work-sites.

Pumps

- Centrifugal and Trash
- Water Transfer
- Vac Assist
- Air-operated, diesel and electric

LIGHT TOWERS

HP Cleaning Equipment

- 3,500 to 40,000 psi
- Air-operated screen cleaners
- Hot water / steam up to 5,000 psi
- Diesel and explosion-proof electric
- Steam generators for de-icing and de-gassing

PUMPS

HIGHEST SAFETY STANDARDS

We run strict quality-control programs on all of our equipment, and we meet or exceed the highest safety standards.

For wind energy equipment rentals, Tiger is your go-to source. We have locations close to you, each with a full range of high-quality equipment. Whatever you need, one call to Tiger makes it happen.

HP CLEANING EQUIPMENT

SAFETY

Tiger Safety Rentals offers specialized services and equipment tailored to meet the demanding requirements for wind turbine safety. We work directly with companies, leveraging our extensive industry experience and unparalleled reach to deliver the highest quality and most cost effective safety equipment and services to our clients.

SAFETY PROFESSIONALS

Tiger provides knowledgeable and highly-trained safety personnel to help increase overall productivity by mitigating risks and assisting you in the development and management of effective workplace safety goals. Our safety personnel are the total package, offering one point of access for many of the services needed to satisfy the strict requirements of wind farm operations.

CONFINED SPACE, FALL PROTECTION & EMERGENCY RESCUE

Tiger Safety has supplied critical safety equipment to many of the oilfield service companies that require their employees to make confined space entries, or that perform fall protection and emergency rescue tasks on the job. Tank and vessel cleaning companies, construction services, painting and blasting, general contractors, marine flushing projects, drilling services and wind energy operators, all rely on Tiger Safety to supply safety services, equipment and personnel.

TANK CLEANING

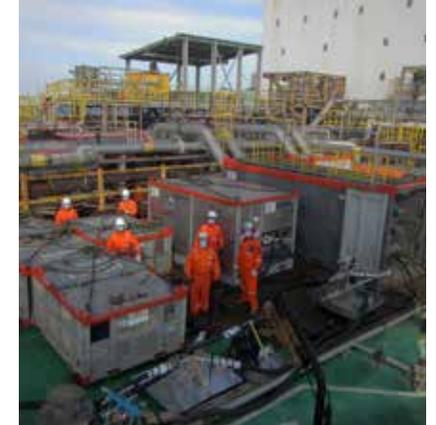

Tiger is recognized for our safety track record and consistently delivering outstanding performance in confined space tank cleaning services globally. We provide de-sludging and decontamination for both liquid and dry bulk storage tanks, utilizing intrinsically safe technology and robust safety procedures to remove various contaminants inclusive of hydrocarbon-based fluids, sludges, SOBMs, WBMs, cement, barite and other dry bulk products. Our typical applications include cleaning of PSVs, Super Tankers, USTs, Pressure Vessels, Cargo Tanks, Ballast Tanks, FPSOs & MODUs.

Tiger handles a multitude of waste streams providing safe storage and transport solutions in compliance with our Journey Management Program. We also provide waste treatment and disposal solutions either at a certified Tiger facility or a 3rd party sub-contractor depending on the work site location.

Our operations are governed by Safe Work Procedures which are customized specific to the job being performed regardless of the application or the tank contents. Our cleaning systems provide a safe, efficient, engineered and environmentally compliant solution with guaranteed results. Tanks and vessels are returned to their original state, free of contamination with minimal interruption to daily operations.

TURN-KEY SERVICES

- Project Management
- Automated & Conventional Confined Space Tank Cleaning
- Dry Bulk (Dust Free) Tank Cleaning
- Waste Treatment: Removal & Remediation
- Hazardous Waste Management: Storage, Transportation & Disposal
- Emergency Spill Response
- Completion Fluids Disposal
- Water Treatment & Recycling
- Bulk Liquid Tank Storage
- Cargo Carrying Units, Tanks & Equipment Rentals

DELIVERING SUSTAINABLE ENERGY SOLUTIONS

When you call on any one of the Tiger companies, you get a highly responsive partner who works hard to bring real value to your operations. Our team of experts understands the challenges of the energy industry. To meet your demands we have skilled dispatchers who are ready to assist you 24/7/365.

At Tiger, we consistently deliver world-class services and reliable rental equipment to get the job done right.

Make it happen.
