

EMERGENCY COKE CUTTING SERVICES

“PLAN THE WORK SO WE CAN WORK THE PLAN”

Contact us today to set up a NO COST on site assessment of your facility and equipment.

Tiger Industrial provides emergency coke cutting services to keep your DCU running in the event of an unscheduled outage. As the pump manufacturer we work closely with the engine, transmission and fluid end providers to control the quality and reliability of our pumping equipment from start to finish. That translates into unequalled reliability when unscheduled downtime is not an option. We have one of the largest, youngest and cleanest fleets in the industry with units certified to the current EPA emissions standards.
